

KMI – Korea Medical Institute (**GANGNAM** (KMI) Center)

Introduction:

Established in **1985**, KMI is a **comprehensive health examination institution** that pursues *safety, cleanliness, kindness*, and accurate **health checkups**.

We provide a different level of health checkup services, and we are also doing our best to support *research, education, publicity, and medical volunteer activities* for the **development of basic medicine** and **disease prevention** in Korea.

KMI's pride, which has written the history of health checkups in Korea by focusing on the comprehensive health checkup business for **more than 30 years**, will be the **driving force** of a medical powerhouse that opens up the world and the future.

KMI promises to become a comprehensive health check-up institution loved by the people by ensuring the health of the people and fulfilling its **social responsibilities**.

The global program can be available for the application at any KMI Korea Medical Institute Centers.
